In general

All prices were decided by the board of directors of DIN Forsyning A/S on 25 November 2024 and subsequently the prices have been processed/reported/approved by the authorities according to the following:

- The prices of the water companies were officially approved by the municipality of Varde on 09 December 2024 and by the municipality of Esbjerg on 10 December 2024.
- The prices of the waste disposal company were officially approved by the municipality of Varde on 09 December 2024 (only applicable for the municipality of Varde).
- The prices of the heating company have been reported to the Danish Utility Regulator.

Please note that the prices may have been rounded off when calculated in DKK including VAT. Subject to printing errors.

Specification and payment of the consumption follow the calendar year.

In December we collect the readings from the remotely read meters per 31 December. Customers who still do not have remotely read meters will receive a self-reading card and the readings must be entered via our website.

Annual statements are calculated on the basis of these meter readings. The actual consumption is compared with the payments on account made during the period. If you have paid too little, this will be billed on your annual statement – if you have paid too much, the amount will be set off against your annual statement. The annual statements are expected to be calculated in the middle of January.

Each year, an annual statement and four payments on account are calculated. The annual statement with the first payment on account is issued for payment on 1 February. The other payments are issued on 1 May, 1 September and 1 November, respectively.

If you need any further information or have questions about prices, please contact our customer centre.

	DKK excl. VAT	DKK incl. VAT and gov. tax*
Per measured m ³ of water up to 30,000 m ³	6.64	16.26
Per measured m ³ of water from 30,001 m ³ to 80,000 m ³	6.14	15.64
Per measured m ³ of water over 80,000 m ³	5.64	15.01
<i>* The government tax for 2025 is DKK 6.37 per m³</i>		
Local protection of ground water, per measured m ³	1.50	1.88

Local protection of ground water

An increasing number of undesirable substances are found in the ground water in Denmark which are difficult and/or more expensive to clean out before we can use it as drinking water. DIN Forsyning has decided that we wish to make an active effort to ensure the drinking water of the future. Therefore, we charge a separate surcharge for local protection of ground water.

Establishment / disconnection

Connection / disconnection of the water supply according to applicable provisions in DIN Forsyning Vand A/S.

Please contact us regarding prices for establishment of sprinkler outlet, disconnection of service pipe etc.

Principles for connection

- *The basis for charging a connection fee can be found in Regulations for DIN Forsyning Vand A/S.*
- *A connection fee is paid according to applicable price list at the time of connection.*
- *As a rule, DIN Forsyning Vand A/S performs, pays and owns all extensions of the supply network and service pipes until the property boundary.*
- *The connection fee is payable before implementation of the connection project.*
- *As a rule, it is recommended to establish individual outlets and reading meters for each housing unit.*
- *For buildings with both housing and industry, payment is made for housing units and industry, respectively.*
- *In case of significant changes to an already connected building, payment is made for the increase in the establishment fee corresponding to the change.*
- *At land development for housing, the connection fee is paid by the developer before any development project may be implemented.*
- *At land development for industry, the connection fee is not to be paid by the owner of building until a connection project is implemented for the building in question (the outlet is established).*

Sedimentation thereafter per m ³	320.00	400.00
Sedimentation – small car / sludge exhauster	1,300.00	1,625.00
Sedimentation – tractor	2,200.00	2,750.00
Extra emptying – ordinary sedimentation	1,200.00	1,500.00
Extra emptying – small car / sludge exhauster / tractor	2,200.00	2,750.00
Additional charge extra hose over 50 metres	640.00	800.00
Collection tanks under 3 m ³ *	1,300.00	1,625.00
Collection tanks thereafter per m ³ *	192.00	240.00
Extra emptying – collection tanks under 3 m ³ *	2,240.00	2,800.00
Futile visit fee (all types)	640.00	800.00

*Only applicable for customers in the municipality of Esbjerg

Reception and treatment of waste water / sludge at sewage treatment plants

	DKK excl. VAT	DKK incl. VAT
Waste water / sludge per m ³ *)	33.74	42.18
Other sludge	Please contact us regarding price	
Minimum payment per delivery	75.00	93.75
Extraordinary opening hours at plant, per delivery	1,000.00	1,250.00

*Sludge must only contain grease that does not require hygienization before final depositing on farmland.

Please contact us to inquire which sewage treatment plants will receive the above.

Municipal road fee

A road fee of 6% is charged for the related establishment investments. The amount is paid on account and is adjusted when the actual investment costs are known in connection with the annual statement.

Special fee

A special fee is paid by companies that discharge particularly polluted waste water into the waste water supply.

The special fee covers the extra costs associated with cleaning of this particularly polluting waste water.

DIN Forsyning Spildevand A/S charges the special fee in accordance with the rules of the Act on special fee for particularly polluted waste water applicable from time to time. The waste water is considered to be particularly polluted if one or several of the below limit values are exceeded and the special fee is calculated for the amount exceeding the limit values.

- 1600 mg/l COD
- 100 mg/l total-nitrogen
- 15 mg/l total-phosphorus

The unit prices below are applicable for 2023 and in relation to 2025, due to increasing costs for primarily removal of sludge, a significant increase in unit prices is expected, in particular COD but also to a less extent phosphorus.

Unit price DKK/kg		COD	N	P
Operation	DKK/kg	0.85	1.48	44.42
Write-offs	DKK/kg	0.16	0.93	3.00
In total	DKK/kg	1.01	2.41	47.42

In connection with the final annual statement, DIN Forsyning Spildevand A/S will submit information about the statement in accordance with section 4 of the Act.

Throughout the year, DIN Forsyning Spildevand A/S will charge payments on account based on the special fee charged of the company for the last year.

Graduated step model

	DKK excl. VAT	DKK incl. VAT
Step 1 – 0-500 m ³	33.74	42.18
Step 2 – 501-20,000 m ³	26.99	33.74
Step 3 – over 20,001 m ³	13.50	16.88

Act no. 1327 of 12/10/2014 ("The Graduated Step Model") allows a discount for businesses that are registered and entitled to payment according to the graduated step model.

Connection

	DKK excl. VAT	DKK incl. VAT
Housing		
Per unit fee/standard fee for a housing unit	64,900.00	81,125.00
Per unit fee only waste water from one housing unit (60% of standard fee)	38,940.00	48,675.00
Private connection to the sewer of the waste water company	8,200.00	10,250.00
Industry		
Per unit fee/standard fee for a business		
per 800 m ² ground area or part thereof is	64,900.00	81,125.00
Per unit fee waste water only for a business is		
60% per 800 m ² ground area or part thereof	38,940.00	48,675.00

- Special conditions apply for residential and commercial properties in open country.
Please contact DIN Forsyning for information about the conditions for connection.
- For properties in areas furnished with waste water sewers where it is not possible to connect for rain water and surface water, the connection fee is 60% of the standard connection fee.

The prices are determined according to the rules of the Payment Statute for Din Forsyning Spildevand A/S as updated on 18/11/2018.

Disconnection

If the function of an area is changed, the owner pays the costs for closing of outlet or establishment of new/extra outlets.

Disused sewer outlets must be closed/sealed off at the main pipe in order to avoid rats getting out.

DIN Forsyning will supervise and approve correct execution of the work. The owner pays the actual costs.

Per measured MWh*	685.40	856.75
Contribution fee per m ²	15.15	18.94
Annual subscription fee	1,248.21	1,560.26

*The energy tax deductible by process-using businesses is calculated each month based on the actual figures. They are published on an ongoing basis on www.dinforsyning.dk

Price example: Standard family with a house of 130 m² and a consumption of heating of 18.1 MWh / 65.16 GJ.

Consumption:	18.1 x 685.40 = 12,405.74	In total for 2025:
Contribution fee:	130 x 15.15 = 1,969.50	15,623.45 + VAT = 19,529.31
Subscription:	1,248.21	If applicable, plus/less temperature discount/fee.

Temperature discount / fee

The temperature discount / fee (previously called the motivation fee) has been introduced effective from 1 January 2019. It is calculated based on how effectively the heat is used in the heating installation of the building. The purpose is to reward customers with the least impact on the district heating system and to give customers extra costs if they do not utilise the system well enough.

The discount / fee is calculated on the basis of the average return temperature of the calorimeter, and the model has four return temperature intervals. As at 1 January 2025, the following intervals apply:

- Under 30°C results in a discount of 0.8% on the variable consumption for each °C under 35°C
- Over 40°C results in a fee of 1% on the variable consumption for each °C over 35°C
- Over 50°C results in a fee of 1.5% on the variable consumption for each °C over 35°C
- Between 30-40°C, the rate has no consequence

The discount / fee is calculated per annum with payment on the annual statement. For customers with monthly settlement and for people vacating their premises, payment is made on the date of the statement. For more information, see www.dinforsyning.dk

How to calculate the temperature discount

Your annual/monthly average return temperature is 26°C.

Temperature difference: 35-26°C = 9

0.8% (discount) of DKK 15,623.45 (variable consumption): 0.8 x 15,623.45 / 100 = 124.99

Discount x temperature difference: 124.99 x 9 = 1,124.91

You will therefore get DKK 1,124.91 back because your system utilises the district heating efficiently.

Reduced contribution fee at frost protection of commercial properties.

At connection of large commercial properties where there is only a requirement for heating to 5°C (frost protection), a reduction can be made in the contribution fee for up to 50% on certain conditions, including installation of a utility limiter. The quantity restriction is installed at the user's expense.

For large process users (annual consumption over 4,187 GJ), who are able to document that the prices are unfair compared to the costs of a realistic alternative heat source for the user, it can be negotiated to determine special prices and conditions.

Subscription fee on heat unit

The subscription fee means that DIN Forsyning makes available a heat unit with weather compensation at the property.

The price of the subscription for the heat unit is per month and is paid through the heating bill.

At the moment, the subscription only applies to district heating customers in Tinghøj.

Subscription heat unit per month	183.00	228.75
----------------------------------	--------	--------

Housing: Single-family houses

Investment fee	10,000.00	12,500.00
Service pipe fee (up to 20 m outlet)	15,000.00	18,750.00
Service pipes in addition to 20 m per m outlet	1,000.00	1,250.00

If site development for district heating has not been paid on the site in an existing district heating area, a basic amount of DKK 31.25 per m² including VAT is also charged. There is a maximum amount per housing unit of DKK 31,250 including VAT.

Conversion of service pipe

Start-up surcharge	4,000.00	5,000.00
Service pipes per m outlet	1,000.00	1,250.00
Demolition of foundation and floor	5,000.00	6,250.00

Housing: Terraced houses / dense settlements

Investment fee	7,000.00	8,750.00
Service pipe fee (up to 20 m outlet)	15,000.00	18,750.00
Service pipes in addition to 20 m per m outlet	1,000.00	1,250.00

If site development for district heating has not been paid on the site in an existing district heating area, a basic amount of DKK 31.25 per m² including VAT is also charged. There is a maximum amount per housing unit of DKK 31,250 including VAT.

Housing: Flats with separate meters

Investment fee	7,000.00	8,750.00
Service pipe fee paid according to dimensions		

The length of the service pipe is calculated from branching at main pipe and to the first set of main valves in the building.

Supporting installations / distributing pipe lines in the building are performed and paid by the owner.
Operation and maintenance of the pipes in the building are performed and paid by the owner.

If site development for district heating has not been paid on the site in an existing district heating area, a basic amount of DKK 31.25 per m² including VAT is also charged. There is a maximum amount per site of DKK 150,000 including VAT.

Site development of housing units

DKK excl. VAT

In new developments, a site development fee is charged for street mains/distribution pipe lines of DKK 25.00 excluding VAT per m² site. There is a maximum amount per site of DKK 25,000 excluding VAT. The amount is charged to the developer of the site before the work is commenced.

Industry: Commercial / office buildings and blocks of flats with joint outlet and meter

Investment fee for buildings up to 250 m ²	10,000.00
Investment fee for buildings over 250 m ²	10,000.00 + 40.00 per m ² over 250 m ²

If site development for district heating has not been paid on the site in an existing district heating area, a basic amount for street mains / distribution pipe lines of DKK 6 per m² site excluding VAT is charged. There is a maximum amount per site of DKK 120,000 excluding VAT. The amount is charged to the owner of the site before the work is commenced.

Service pipes

DKK excl. VAT

DKK incl. VAT

Service pipes are paid according to dimensions after specific length.
The prices can be found in the below table:

Installation of lock on garbage bin (including keys and exchange fee)	750.00	937.50
Replacement of destroyed/lost bins including delivery:		
140 L bins with lid	500.00	625.00
240 L bins with lid	700.00	875.00
400 L bins with lid	1,500.00	1,875.00
660 L bins with lid	1,600.00	2,000.00

Waste bins:

The bins belong to DIN Forsyning Affald A/S and no investment fee is payable. The bins can be used and cleaned bins.

A delivery fee is charged for delivery of bins.

Deregistration of household waste and recycling systems:

Deregistration of system for household waste is only possible if the house is unoccupied. The property must be registered as soon as it is occupied again. Deregistration can take place for a maximum period of 6 months at a time. There is no exemption for payment of fee for recycling systems.

Application for exemption must be made in writing to DIN Forsyning via the website of DIN Forsyning. At exemption, the bins will be collected and a collection fee will be charged.

Deregistration of the recycling system is only possible at permanent demolition of a property. Documentation must be produced in the form of a notification of completion in the BBR (the Danish Building and Housing Register). Documentation for demolition rests with the customer. DIN Forsyning is not automatically informed by the BBR regarding demolitions.

For payments on account, the amount is transferred to the next invoice	
Administration fee per invoice. Invoices registered for payment service are exempted	50.00
Handling charge for submission of invoice copy	50.00

Reminder procedure

DIN Forsyning's terms of payment are: End of the month + 1 day.

If the invoice has not been paid on the due date, the outstanding amount is included in our ordinary reminder procedure:

- Reminder 1 is sent 12 days at the latest after the due date. Interest and a reminder fee are added.
- Reminder 2 is sent after a further 15 days. This will contain a closing notice and the time for closing. Interest and a reminder fee are also added to this reminder.
- No later than 18 days after the due date of Reminder 2, the supply of water and heating will be closed without further notice. A fee will be charged for the closing visit.
- After closing of the supply, the outstanding amount is handed over to a debt-collecting firm.

If the closing has been implemented, a closing fee will be added. The supply will not be reopened until the entire outstanding amount including the closing fee has been paid. After this, we may charge a deposit as security for future supply.

In case of arrears on waste we have the option to request a foreclosure procedure for the property of the person in arrears if the customer does not pay for collection of waste.

Interest

At late payment, interest will be added according to legislation in force.

Interest is added each month from the due date. Interest is added to the next invoice.

Payment agreement

It is possible to enter into a payment agreement with us. However, it is a condition that the payment agreement is completed and the amount paid before we issue the next invoice. A fee is charged for establishment of a payment agreement and the agreement must be concluded before an arrears closing is implemented.
