1 In general

All prices were decided by the board of directors of DIN Forsyning A/S on 31 October 2022 and subsequently the prices have been processed/reported/approved by the authorities according to the following:

- The prices of the water plant were officially approved by the municipality of Varde on 15 December 2022 and the municipality of Esbjerg on 25 November 2022.
- The prices of the waste disposal company were finally approved by the municipality of Varde on 15 December 2022 (only applies to the municipality of Varde).
- The prices of the heating company have been reported to the Danish Utility Regulator.

Please note that the prices may have been rounded off when calculated in DKK including VAT. Subject to printing errors.

Specification and payment of the consumption follow the calendar year. In December we collect the readings from the remotely read meters per 31 December. Customers who still do not have remotely read meters will receive a self-reading card and they must enter the readings on our website.

Annual statements are calculated on the basis of these meter readings. The actual consumption is compared with the payments on account made during the period. If you have paid too little, this will be billed on your annual statement – if you have paid too much, the amount will be set off against your annual statement. The annual statements are expected to be calculated in the middle of February.

Each year, an annual statement and four payments on account are calculated. The annual statement with the first payment on account is issued for payment on 1 March. The following payments are issued on 1 May, 1 September, and 1 November, respectively. If you need any further information or have questions about prices, please contact our customer centre.

Our customer centre

Our customer centre is physically located at Ulvsundvej 1, 6715 Esbjerg N, Denmark. If you have any questions, you are welcome to visit us or call us during opening hours.

225 mm -	300,000.00	375,000.00

** The applicable local plan is the administrative basis*

2.3.3 Establishment / disconnection

Connection / disconnection of the water supply will be according to applicable provisions in DIN Forsyning Vand A/S.

Please contact us regarding prices for establishment of sprinkler outlet, disconnection of service pipe etc.

2.3.4 Principles for connection:

- The basis for charging a connection fee can be found in Regulations for DIN Forsyning Vand A/S.
- A connection fee is paid according to applicable price list at the time of connection.
- As a rule, DIN Forsyning Vand A/S performs, pays and owns all extensions of the supply network and service pipes until the property boundary.
- The connection fee is payable before implementation of the connection project.
- As a rule, it is recommended to establish individual outlets and reading meters for each housing unit.
- For buildings with both housing and industry, payment is made for housing units and industry, respectively.
- In case of significant changes to an already connected building, payment is made for the increase in the establishment fee corresponding to the change.
- At land development for housing, the connection fee is paid by the developer before any development project may be implemented.
- At land development for industry, the connection fee is not to be paid by the owner of building until a connection project is implemented for the building in question (the outlet is established).

3 DIN Forsyning Spildevand A/S

3.1 Utility prices

3.1.1 Drainage fee for buildings with water meters

	DKK excluding VAT	DKK including VAT
Drainage fee per m ³	27.16	33.95
Buildings connected to vacuum system per m ³	8.15	10.19
Reduction for electricity supplied to household pump units per m ³	-1.31	-1.64
Fixed fee	686.00	857.50

Regarding graduated step model, see section 3.6

3.1.2 Drainage fee for buildings without water meters

	DKK excluding VAT	DKK including VAT
For buildings without water meters, the drainage fee is determined on the basis of an estimated consumption		
Detached houses 170 m ³	4,617.20	5,771.50
Holiday houses 70 m ³	1,901.20	2,376.50
Fixed fee	686.00	857.50

3.2 Emptying of sedimentation tank

Collection tanks and Trix tanks	DKK excluding VAT	DKK including VAT
Sedimentation under 3 m ³	520.00	650.00
Sedimentation thereafter per m ³	180.00	225.00
Sedimentation – small sludge exhauster/tractor	1,000.00	1,250.00
Collection tanks under 3 m ³ *	900.00	1,125.00
Collection tanks thereafter per m ³ *	180.00	225.00
Futile drive	500.00	625.00

* Only applicable for customers in the municipality of Esbjerg

3.3 Reception and treatment of waste water / sludge at sewage treatment plants

	DKK excluding VAT	DKK including VAT
Grease*	0.00	0.00
Easy-flowing sludge <3% per m ³ (septic sludge)	75.00	93.75
Thick sludge ≥ 3% per m ³	250.00	312.50
Waste water from collection tanks per m ³	10.00	12.50
Flushing water	0.00	0.00
Other sludge	Please contact us regarding price	
Minimum payment per delivery (grease and flushing water)	75.00	93.75
Extraordinary opening hours at plant, per delivery	1,000.00	1,250.00
* Only grease that does not require hygienization before final depositing on farmland. ** Please contact us to inquire which sewage treatment plants will receive the above.		

3.4 Municipal road fee

A road fee of 6% is charged for the related establishment investments. The amount is paid on account and is adjusted when the actual investment costs are known in connection with the annual statement.

3.5 Special fee

A special fee is paid by companies that discharge particularly polluted waste water into the waste water supply. The special fee covers the extra costs associated with cleaning of this particularly polluting waste water.

DIN Forsyning Spildevand A/S charges the special fee in accordance with the rules of the Act on special fee for particularly polluted waste water applicable from time to time. The waste water is considered to be particularly polluted if one or several of the below limit values are exceeded and the special fee is calculated for the amount exceeding the limit values.

- 1600 mg/l COD
- 100 mg/l total-nitrogen
- 15 mg/l total-phosphorus

The unit prices below are applicable for 2020 but can be used as indicative prices for the next year provided there are no noticeable changes regarding costs and limit values.

Unit price DKK/kg		COD	N	P
Operation	DKK/kg	0.94	1.01	35.81
Write-offs	DKK/kg	0.16	1.13	3.43
In total	DKK/kg	1.11	2.14	39.25

In connection with the final annual statement, DIN Forsyning Spildevand A/S will submit information about the statement in accordance with section 4 of the Act.

Throughout the year, DIN Forsyning Spildevand A/S will charge payments on account based on the special fee charged of the company for the last year.

3.6 Graduated step model

	DKK excluding VAT	DKK including VAT
Step 1 - 0-500 m ³	27.16	33.95
Step 2 - 501-20,000 m ³	21.73	27.16
Step 3 - above 20.001 m ³	10.86	13.58

Act no. 1327 of 12/10/2014 ("The Graduated Step Model") allows a discount for businesses that are registered and entitled to payment according to the graduated step model.

3.7 Connection

3.7.1 Housing

	DKK excluding VAT	DKK including VAT
Per unit fee/standard fee for a housing unit	59,700.00	74,625.00
Per unit fee <u>only</u> waste water from one housing unit (60% of standard fee)	35,820.00	44,775.00
Private connection to the sewer of the waste water company	7,600.00	9,500.00

3.7.2 Industry

	DKK excluding VAT	DKK including VAT
Per unit fee/standard fee for a business per 800 m ² ground area or part thereof	59,700.00	74,625.00
Per unit fee <u>only</u> waste water for a business is 60% per 800 m ² ground area or part thereof	35,820.00	44,775.00

- Special conditions apply for residential and commercial properties in open country. Please contact DIN Forsyning for information about the conditions for connection.
- For properties that are not connected for rain water and surface water, the connection fee is 60% of the standard connection fee.

The prices are determined according to the rules of the Payment Statute for DIN Forsyning Spildevand A/S as updated on 18/11/2018.

3.8 Disconnection

If the function of an area is changed, the owner pays the costs for closing of outlet or establishment of new/extra outlets.

Disused sewer outlets must be closed/sealed off at the main pipe in order to avoid rats getting out.

DIN Forsyning will supervise and approve correct execution of the work. The owner pays the actual costs.

4 DIN Forsyning Varme A/S

4.1 Utility prices

	DKK excluding VAT	DKK including VAT
ESBJERG:		
Per measured GJ*	155.06	193.83
Contribution fee per m ²	13.41	16.76
Annual subscription fee	1,119.66	1,399.58
* The energy tax deductible by process-using businesses is calculated each month based on the actual figures. They are published on an ongoing basis on www.dinforsyning.dk .		
VARDE:		
Per measured MWh*	558.21	697.76
Contribution fee per m ²	13.41	16.76
Annual subscription fee	1,119.66	1,399.58

* The energy tax deductible by process-using businesses is calculated each month based on the actual figures. They are published on an ongoing basis on www.dinforsyning.dk.

4.1.1 Motivation fee

The motivation fee has been introduced effective from 1 January 2019. It is calculated based on how effectively the heat is used in the joint district heating system. The purpose is to reward customers with the least impact on the district heating system and to give customers extra costs if they do not utilise the system well enough.

The fee is calculated on the basis of the average return temperature of the calorimeter, and the model has four return temperature intervals. As at 1 January 2023, the following intervals apply:

- Under 30°C results in a discount of 1% on the variable consumption for each °C under 35.
- Over 41°C results in an extra cost of 1% on the variable consumption for each °C over 35 and increasing to 1.5% on the variable consumption for each °C over 51.
- Between 30-41°C, the fee has no consequence.

The fee is calculated per annum with payment on the annual statement. For customers with monthly settlement and for people vacating their premises, payment is made on the date of the statement. For more information, see www.dinforsyning.dk

4.1.2 Reduced contribution fee at frost protection of commercial properties.

At connection of large commercial properties where there is only a requirement for heating to 5°C (frost protection), a reduction can be made in the contribution fee for up to 50% on certain conditions, including installation of a utility limiter.

The quantity restriction is installed at the user's expense.

For large process users (annual consumption over 4,187 GJ), who is able to document that the prices are unfair compared to the costs of a realistic alternative heat source for the user, it can be negotiated to determine special prices and conditions.

4.1.3 Subscription fee on heat unit

The subscription fee means that DIN Forsyning makes a heat unit with weather compensation available at the property. The price of the subscription for the heat unit is per month and is paid through the heating bill. At the moment, the subscription only applies to district heating customers in Tinghøj.

	DKK excluding VAT	DKK including VAT
Subscription heat unit per month	239.80	299.75

4.2 Other services and fees

	DKK excluding VAT	DKK including VAT
Replacement meter – Multical 602		
Qp 1.6 and Qp 2.5 m ³	2,155.00	2,693.75
Qp 6 m ³	4,326.00	5,407.50
Qp 10 m ³	5,340.00	6,675.00
Qp 15 m ³	6,372.00	7,965.00
Qp 25 m ³	7,710.00	9,637.50
Qp 40 m ³	9,003.00	11,253.75
Qp 60 m ³	10,811.00	13,513.75
Testing of meter		
For ordinary household (Qp 2.5 m ³)	1,500.00	1,875.00
Other types of meters	Please contact us regarding price	
Resealing of meter		
Qp 1.5 – Qp 150 m ³	660.00	825.00
Reestablishment of 24 V power supply to meter	660.00	825.00

4.3 Connection

4.3.1 Housing

4.3.1.1 Single-family houses

	DKK excluding VAT	DKK including VAT
Investment fee	10,000.00	12,500.00
Service pipe fee (up to 20 m outlet)	10,000.00	12,500.00
Service pipes in addition to 20 m per m outlet	1,160.00	1,450.00

If site development for district heating has not been paid on the site in an existing district heating area, a basic amount of DKK 25.00 per m² including VAT is also charged. There is a maximum amount per housing unit of DKK 25,000 including VAT.

4.3.1.2 Terraced houses / dense settlements

	DKK excluding VAT	DKK including VAT
Investment fee	7,000.00	8,750.00
Service pipe fee (up to 20 m outlet)	10,000.00	12,500.00
Service pipes in addition to 20 m per m outlet	1,160.00	1,450.00

If site development for district heating has not been paid on the site in an existing district heating area, a basic amount of DKK 25.00 per m² including VAT is also charged. There is a maximum amount per housing unit of DKK 25,000 including VAT.

4.3.1.3 Flats with separate meters

	DKK excluding VAT	DKK including VAT
Investment fee	7,000.00	8,750.00
Service pipe fee paid according to dimensions		

The length of the service pipe is calculated from branching at main pipe and to the first set of main valves in the building.

Supporting installations / distributing pipe lines in the building are performed and paid by the owner. Operation and maintenance of the pipes in the building are performed and paid by the owner.

If site development for district heating has not been paid on the site in an existing district heating area, a basic amount of DKK 25.00 per m² including VAT is also charged. There is a maximum amount per site of DKK 125,000 including VAT.

4.3.1.4 Site development of housing units

In new developments, a site development fee is charged for street mains / distribution pipe lines of DKK 20.00 excluding VAT per m² site. The amount is charged to the developer of the site before the work is commenced.

4.3.2 Industry

4.3.2.1 Commercial / office buildings and blocks of flats with joint outlet and meter

	DKK excluding VAT
Investment fee for buildings up to 250 m ²	10,000.00
Investment fee for buildings over 250 m ²	10,000.00 + 40.00 per m ² over 250 m ²

If site development for district heating has not been paid on the site in an existing district heating area, a basic amount for street / distribution pipe lines of DKK 5 per m² site excluding VAT is also charged. There is a maximum amount per site of DKK 100,000 excluding VAT. The amount is charged to the owner of the site before the work is commenced.

4.3.2.2 Service pipes

Service pipes are paid according to dimensions after specific length.
The prices can be found in the below table:

Dimensions	DKK excluding VAT	DKK including VAT
max 34 mm - per m outlet	1,160.00	1,450.00
max 42 mm - per m outlet	1,253.00	1,566.25
max 48 mm - per m outlet	1,341.00	1,676.25
max 60 mm - per m outlet	1,456.00	1,820.00
max 76 mm - per m outlet	1,658.00	2,072.50
max 89 mm - per m outlet	1,817.00	2,271.25
max 114 mm - per m outlet	2,147.00	2,683.75
max 139 mm - per m outlet	2,531.00	3,163.75
max 168 mm - per m outlet	2,825.00	3,531.25

In cases of construction of special buildings with a heat requirement that deviates from what is considered to be normal in the applicable building regulations, an agreement can be made on special conditions.

4.3.3 Site development industry

In new developments a site development fee is charged for street / distribution pipe lines of DKK 5.00 per m² developed site excluding VAT. There is a maximum amount per site of DKK 100,000 excluding VAT. The amount is charged to the developer of the site before the work is commenced.

5 DIN Forsyning Affald A/S (only applicable for the municipality of Varde)

5.1 Household waste

5.1.1 Residual waste and food waste in two-compartment garbage bins – single-family houses

Emptying every fortnight	DKK excluding VAT	DKK including VAT
Two-compartment 240 L garbage bin	897.00	1,121.25

660 L with blue lid	1,123.00	1,403.75

* Must be ordered at dinforsyning.dk and subsequently collected at a recycling depot of your choice against production of receipt.

Waste bins:

- The bins belong to DIN Forsyning Affald A/S and no investment fee is payable. The bins delivered bins can be used and cleaned bins. A delivery fee is charged for delivery of bins.
- At special emptying where the municipality has granted dispensation for the waste disposal company's collection at the property, the actual costs for emptying will be added to the emptying price per bin. Special emptying is used for emptying of bins where certain conditions and rules have not been complied with. (If for example the access road does not comply with the requirements for gradient, stairs, loose gravel etc.).

Deregistration of waste collection and recycling systems:

- Deregistration of system for waste collection is only possible if the house is unoccupied. The property must be registered as soon as it is occupied again. Deregistration can take place for a maximum period of 6 months at a time. There is no exemption for payment of fee for recycling systems.
- Application for exemption must be made in writing to DIN Forsyning via the website of DIN Forsyning. At exemption, the bins will be collected and a collection fee will be charged.

- Deregistration of the recycling system is only possible at permanent demolition of a property. Documentation must be produced in the form of a notification of completion in the BBR (the Danish Building and Housing Register). Documentation for demolition rests with the customer. DIN Forsyning is not automatically informed by the BBR regarding demolitions.

6 Other services and fees

6.1 In general

Fee regarding reporting of meter readings	DKK including VAT
Reporting of meter readings via the website	Free of charge
Reporting of meter readings via reading card	Ordinary postage
Reading fee – meter reading by employee according to agreement	300.00
Reading fee – meter reading by employee at lacking reporting of readings or lacking submission of self-reading card	300.00
Fee for estimated reading one year on end – charged for installations where we have not received readings for one year	300.00
Fee for procuring of meter reading through the bailiff's court, including locksmith if the meter reader is refused access	Payment as per account rendered

Fee for lacking payment	DKK exempt from VAT
Reminder fee per reminder	100.00
At too late payment, interest is added for	8% p.a.
Arrears visit/closing visit by Varme, Vand og Spildevand Including reopening <u>within</u> normal working time when the entire outstanding amount has been paid.	975.00
Arrears visit/closing visit by Varme, Vand og Spildevand Including reopening <u>outside</u> normal working time when the entire outstanding amount has been paid.	1,950.00
Fee for establishment of payment agreement	150.00
Fee for enforcement proceedings including locksmith	Payment as per account rendered
Securing of water installation where the customer has reopened the supply themselves after closing visit without permission	Payment as per account rendered
Compensation amount for businesses	310.00

Other fees	DKK including VAT
Extraordinary settlement – final settlement of an installation	150.00
Administration fee in connection with moving-out report	150.00
Minimum amount/triviality limit	50.00
We do not charge or pay amounts below the triviality limit on a settlement. For payments on account, the amount is transferred to the next settlement.	
Administration fee per invoice – invoices registered for payment service are exempted	50.00
Handling charge for submission of invoice copy	50.00

7 Reminder procedure

DIN Forsyning's terms of payment are: End of the month + 1 day.

If the invoice has not been paid on the due date, the outstanding amount is included in our ordinary reminder procedure:

- Reminder 1 is sent 12 days at the latest after the due date. Interest and a reminder fee are added.
- Reminder 2 is sent after a further 15 days. This will contain a closing notice and the time for closing. Interest and a reminder fee are also added to this reminder.
- No later than 18 days after the due date of Reminder 2, the supply of water and heating will be closed without further notice. A fee will be charged for the closing visit.
- After closing of the supply, the outstanding amount is handed over to a debt-collecting firm.

If the closing has been implemented, a closing fee will be added. The supply will not be reopened until the entire outstanding amount including the closing fee has been paid.

In case of arrears on waste we have the option to request a foreclosure procedure for the property of the person in arrears if the customer does not pay for collection of waste.

Interest

At late payment, interest will be added according to the Danish Act on Interest. Interest is added each month from the due date. Interest is added to the next invoice.

Payment agreement

It is possible to enter into a payment agreement with us. However, it is a condition that the payment agreement is completed and the amount paid before we issue the next invoice. A fee is charged for establishment of a payment agreement and the agreement must be concluded before an arrears closing is implemented.
